Picture Frame Aquarium

A beautifully designed aquarium described as "a living work of art".

The Picture Frame Aquarium is a dramatic and eye-catching addition to any room.

An ingenious mirrored interior creates the illusion of a spacious tropical underwater habitat despite only measuring just 124mm deep.

The quality hand crafted surround fits flush to the wall and completely conceals the sides of the aquarium. Hidden hinges enable easy access to the interior and, with the addition of an automatic feeder and remote control lighting unit, disturbances can be kept to a minimum.

We ensure that the Picture Frame Aquarium is installed to the highest standard by our own trained technicians, on either solid or stud partition walls. But our services do not stop there.

For those who require ongoing maintenance of their aquarium, we offer a range of packages to ensure each unit retains its wow factor month after month.

For further information, or to arrange a no obligation site visit to discuss your particular requirements, please contact our office.

Available to purchase or hire.

NB: suitable for tropical fishkeeping only.
